

# AM POWDER REJUVENATION

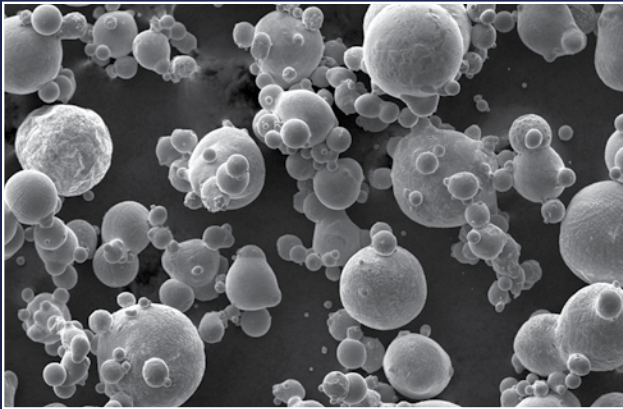

WITH 6K ADDITIVE SERVICES

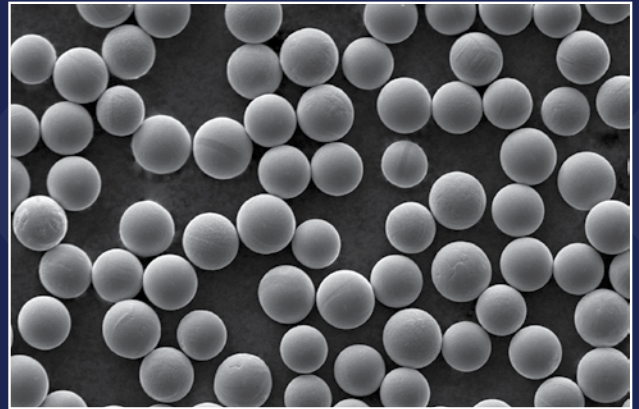

**REJUVENATE YOUR POWDER  
REJUVENATE YOUR INVESTMENT**

# HAS YOUR USED AM POWDER GONE FROM GOOD TO BAD?

**BAD | USED AM NICKEL POWDER**

**GOOD | 6K REJUVENATED NICKEL POWDER**

## GET VALUE BACK AND SELL 6K YOUR USED POWDER.

At 6K our mission is to drive the circular economy by utilizing feedstock derived from sustainable sources and **used powder** is one of those sources.

**Connect with us at [sales@6Kadditive.com](mailto:sales@6Kadditive.com)** and let us lower your hassle of disposal while **giving you back value on your past investment.**

- › Up to 60% reduction in Oxygen content
- › 20% increase in tap density
- › 20% improvement in flowability
- › Tightened PSD

# UPCYCLE USED POWDER INTO PREMIUM POWDER

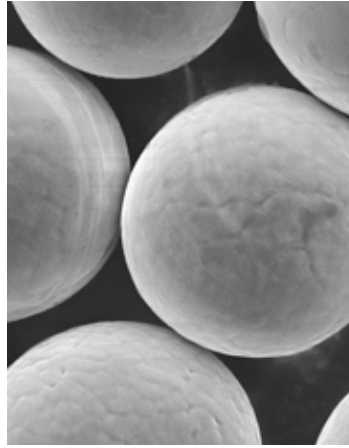

## CONVERT UNUSABLE AM POWDERS BACK INTO USABLE POWDER.

6K's UniMelt® platform has the ability to rejuvenate a host of powders including Ni, Ti and Fe alloys to name just a few. Unlike other powder manufacturing technologies, the UniMelt process has the unique ability to reduce oxygen levels, improve morphology and significantly improve flowability. Leverage the investment and rejuvenate your used powder back into premium powder for aerospace, industrial and medical applications.

### FREE FLOWING AND SPREADABLE

6K's process ensures that high flowability is restored with rejuvenated powders helping to maximize productivity. Free flowing and spreadable.

### HIGH SPHERICITY & NO SATELLITES

6K's process eliminates satellites and porosity when upcycling with UniMelt microwave plasma technology

### HIGH DENSITY POWDER

Unlike competitive technologies, 6K's process delivers fully dense, highly-spherical powders without porosity

**Sell 6K your used powder | [sales@6Kadditive.com](mailto:sales@6Kadditive.com)**

- Shape the future of sustainable advanced material powder production for Additive Manufacturing
- Significantly reduce the volume of material sent to landfill
- Upcycle scrap material into premium AM powder
